

FACKELMANN®

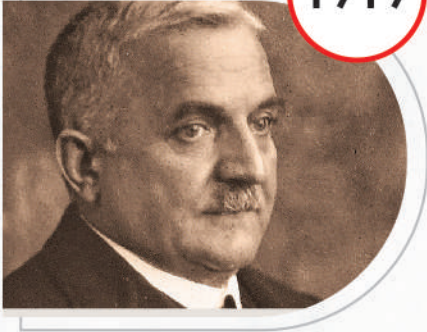

GERMAN
BRAND since
1919

YOU HAVE THE PASSION | WE HAVE THE TOOLS

World's Leading Kitchenware Brand Now In India

1919

Founding By The Fackelmann Brothers

The three brothers August, Ludwig and Heinrich Fackelmann leave their father's farm in Lower Franconia for Nuremberg, Stuttgart and Munich in search of new opportunities. In 1919, under Heinrich's leadership, the "Fackelmann Works Representatives for Households and Hardware" is founded in Nuremberg.

1948

Sebastian Fackelmann Takes Over The Business

After the early death of the founder Heinrich, Sebastian Fackelmann follows in his father's footsteps and, after the end of the Second World War, initially continues the business as a sales representative. Thanks to his years of apprenticeship at the Nuremberg family business Küchen-Loesch, he has by now become quite familiar with kitchen helpers and household issues.

1958

From Wholesale To In-House Production

Sebastian Fackelmann is the sole managing director and is gradually expanding his agency into a wholesale business. In 1958 he starts the series production of wooden goods - such as toothpicks, mixing spoons, breakfast boards and small furniture - in his first own production facility in Altensittenbach near Hersbruck.

1981

Kitchen Gadgets For The Modern Household

Modern kitchen gadgets for modern households: At the Hersbruck location, plastic kitchen gadgets are also manufactured from the early 1980s. A great advantage of the long-lasting products is their dishwasher compatibility.

1984

The 3rd Generation Joins The Company

Alexander Fackelmann, who holds a degree in business administration, begins his career in the family-owned company in 1984. His focus is on sales, marketing, business development and globalization, which he consistently promotes and implements.

1987

Establishment of The First Foreign Branch

An important milestone for the sustainable development of international business is laid at the end of the eighties - with the establishment of EQH (European Quality Housewares) in Hong Kong, the gate to the Far East opening even further.

1989

Modular System and Distinctive Logo

Alexander Fackelmann introduces and implements the modular Fackelmann shelving system in the trade. The customer-friendly and tidy presentation of goods is a milestone, both for the company itself and for the entire trade. He also develops the striking company logo, the black Fackelmann lettering on a red bar, which has barely changed to this day.

1993

International Expansion

Fackelmann grows rapidly in the 90s - gradually more and more branches are added abroad. The Czech Republic is the first, followed a year later by France and Bulgaria, subsequently followed by Hungary, Poland, Slovenia and Italy.

2003

New On Board: The Baking Mould Expert, Zenker

With the takeover of the baking mould specialist, Zenker, the second German production site of Fackelmann Brands is now in Aichach, Bavaria. All of the brand's baking moulds are manufactured on site under the highest quality tests, using the most modern manufacturing techniques. Innovative coating systems, modern colours and assortments for every taste and requirement spread to the whole world starting from the Swabian city.

2004

Europe And Beyond

The international expansion continues with more branches: Spain, Romania and Croatia, UK (2005), China and India (2007) with large production facilities, UAE (2007), Serbia (2008), Indonesia, Taiwan, Thailand, Singapore (2009), Singapore (2009), Ukraine (2010), Australia (2012), Russia and Brazil (2013).

2013

Baking at the highest level : Dr Oetker Kitchen Helpers

In 2013, Dr Oetker baking moulds and kitchen aids underwent a long-term license agreement with Zenker. Since then, the baking moulds specialist from Aichach in upper Bavaria - Zenker - has accelerated its creative and innovative product range expansions and original concepts, helping new baking habits create a breakthrough in the global market.

2015

Fackelmann Goes Down Under!

The renowned Australian manufacturer McPherson's becomes Fackelmann Housewares Australia and New Zealand. Fackelmann thus positions itself strongly with the brands Wiltshire, Stanley Rogers and Furi. The traditional brands Stanley Rogers - premium kitchen gadgets - and Furi - professional knives - are now also available in Europe. The markets in Singapore and Hong Kong are also served from Australia.

2018

Two New Additions To Fackelmann Brands

Tomkin, headquartered in Sydney, has been the market leader in the hospitality industry in Australia for over 40 years with many well-known brands in its portfolio. Tomkin is the perfect complement to Fackelmann Australia. New Wechsler in South Africa has stood for household goods, kitchen gadgets, cutlery and glasses for more than 70 years. With the acquisition of its shares, Fackelmann strengthens its position in the African continent.

2019

Centenary Wishes, Fackelmann!

Fackelmann turns 100 - a reason to celebrate! In this anniversary year, the company not only appears in a completely new guise at the leading Ambiente trade fair, but also opens its first flagship store, the Fackelmann Welt, at its headquarters in Hersbruck. There is also a lot going on digitally: The fackelmann.de online shop now offers the opportunity to immerse yourself in the variety of Fackelmann products around the clock.

2022

India : A New Beginning

Another feather is added to Fackelmann's cap, with the Indian factory becoming fully operational in the year 2022. This takes the total tally of Fackelmann's production facilities worldwide to nine. While manufacturing quality products for the Indian market, this unit is also slated to produce & export products for the global market.

**50 SUSTAINABILITY
 & CLIMATE LEADERS**

Sustainability has been at the core of Fackelmann Brand's ideals for many years. Becoming an important member of the 50 Sustainability & Climate Leaders project is an important step in this direction. The 50 Sustainability & Climate Leaders project is the response from the International Business Community which demonstrates the desire, the leadership, and the will to take effective action in the fight against Climate Change. Please visit 50climateleaders.com to know more.

**FAIR
 ECO
 SAFE**

For more than a decade, the primary focus of the kitchen sector has been on food safety and hygiene. We believe in ethically sourced and ecologically sound products. All our products are produced under fair conditions, and we are constantly working on using the materials as ecologically as possible and guaranteeing the highest product safety, which we ensure through our standard and regular audits.

ISCC

International Sustainability and Carbon Certification (ISCC), based in Cologne, is a certification system that distinguishes agricultural raw materials in Germany, the European Union and other countries that comply with the sustainability regulations for bio-energy.

Fackelmann received the "1st place" award in the category "Best Product Quality 2022" in the current Deutschland Test study. A total of 1,182 companies and brands from 69 different industries were put to the test.

Stanley Rogers

Since 1930, Stanley Rogers has been renowned for quality, craftsmanship and timeless style. Australia's most iconic cutlery brand.

Füri®

Engineered for innovation, design and performance. Chosen by leading chefs. **Think differently, made differently, cut differently.**

wiltshire®
